Perth, WA, 6005 | LinkedIn: <https://www.linkedin.com/in/patricktheodore/>
Portfolio: <https://patricktheodore.github.io/patricktheodore-portfolio/>

Full stack web developer leveraging background in hospitality management and architecture to build a more aesthetically pleasing and intuitive UI experience. Earned a certificate in Full Stack Web Development from the University of Western Australia Coding Boot Camp. Passionate about innovative problem solving and developing fluid, intuitive, and well designed apps, with a focus on mobile-first responsive design and development. I'm very excited to apply my expanding skill set and build on my knowledge as part of a quality-driven team.

TECHNICAL SKILLS

HTML5, CSS3, JavaScript ES6+, GitHub, GitLab, Node.js, jQuery, Bootstrap, Foundation, Figma, FontAwesome, SweetAlert, Media Queries, Fetch API's, Local Storage, the command line, Adobe Creative Suite.

PROJECTS/APPLICATIONS BUILT

ReadMe-Generator | Lead-Developer |

<https://github.com/patricktheodore/perfect-readme-generator>

- A command line application powered by node.js and the inquirer package, to prompt users for information about their application repository, resulting in a readme.md file with all their responses collated in a stylish format.
- Node.js, JavaScript, npm, Inquirer Package.

Football-Highlights-Hub | Lead-Developer |

<https://patricktheodore.github.io/football-highlights-dashboard/>

- Hub to view highlights from the English Premier League, using foundation css framework and fetching from two separate API's to result in a dashboard with embedded highlight videos from recent games, dynamically generated upcoming fixtures lists, and a updated live ladder.
- jQuery, fetch API, foundation css framework, moment.js.

Weather-Dashboard | Lead-Developer |

<https://patricktheodore.github.io/weather-dash/>

- A dynamically loaded weather dashboard, powered by jQuery, moment.js and openweather API, users can search for locations from around the world, and receive up to date weather conditions, as well as a forecast for the rest of the week. Searches are saved and displayed using local storage.

- jQuery, bootstrap css framework, moment.js, openweather API
